Summary

I am a Cloud Engineer who is knowledgeable and skilled in AWS with a wealth of experience in technical support and a strong background in networking. I am seeking a dynamic role where I can contribute by leveraging my current skill set whilst also challenging myself by acquiring new skills, knowledge and expanding both my technical and professional horizons beyond my comfort zone.

Skills

Languages: Python, Java.

Technologies and Tools: AWS, Linux, Windows, Terraform, VS Code, Git, WireShark, GenAI (Amazon Bedrock, Amazon Q Developer)

Key Achievements

- Resolved 2500+ customer tickets earning 300+ five star ratings in the process as a member of the AWS Premium Support team.
- Resolved 150+ CloudWatch escalations as a member of an in-house CloudWatch specialised team between January 2023 to date.
- Accredited CloudWatch Subject Matter Expert (SME).
- Led a CloudWatch upskilling initiative at local site level and supported its global rollout, driving impact and benefits across the support engineering team.

Work Experience

Cloud Support Engineer II, Amazon Web Services, Cape Town, South Africa

October 2024 - Present

In addition to the duties encompassed in previous level (CSE I) also took on the below:

- Developed and maintained tools used by the team in day to day customer support processes.
- Developed and maintained training labs that reduced ramp-up time, strengthened technical proficiency, and supported continuous improvement for the CloudWatch support team.
- Languages and Tools used: Python, CloudFormation, Git, GenAI (Bedrock, Q Developer) tools.

Cloud Support Engineer I, Amazon Web Services, Cape Town, South Africa

May 2021 - September 2024

- Replicated customer workloads in AWS cloud to investigate issues, find solutions and/or mitigation strategies.
- Resolved 2500+ technical customer tickets - ticketing system allowed engagement with customers via Email, Chat and Call channels.

- Authored two technical (AWS internal) CloudWatch troubleshooting articles which have amassed a combined 249 views and 17 likes to date.
- Conducted technical training sessions (AWS internal) to onboard and upskill new team members earning a 90% positive feedback for the sessions.
- Conducted technical interviews as a member of the recruitment team.

Cloud Support Associate, Amazon Web Services, Cape Town, South Africa

November 2019 - April 2021

In addition to some of the above duties:

- Acted as Profile Primary (a point of contact role) actively monitoring ticket queue and pro-actively engaged the relevant teams and engineers to handle high severity customer issues.

Systems Engineer, Broadcasting Authority Of Zimbabwe, Harare, Zimbabwe

June 2015 - October 2019

- Configured and maintained digital TV head-end equipment (IRDs, Encoders, Multiplexers).
- Maintained and monitored Windows servers and networking (Cisco, Huawei) at the digital TV head-end.
- Installed business systems on Windows Servers - EPG, CAS, NMS, XMS/XMU.
- Installed TV studio, Radio studio and digital transmission site equipment.
- Configured and maintained Windows, Cisco, Huawei site equipment.

ICT Technician, Ministry of Primary and Secondary Education, Bulawayo, Zimbabwe

September 2013 - May 2015

- Installation and Configuration of ICT equipment (Computers, Printers, Access Points).
- Creating school timetables using ASC Timetables, a dedicated time table creation software.

Education

Bsc (HON) Computer Science, National University of Science and Technology, Zimbabwe, 2009 - 2013

Certifications [\[Verify my certifications by clicking here\]](#):

- AWS Certified Developer - Associate *(July 2025)*
- Certified Entry Level Python Programmer [PCEP-30-02] *(July 2024)*
- AWS Certified Solutions Architect - Associate *(June 2024)*
- Oracle Certified Associate, Java SE 8 Programmer *(December 2018)*

Project Work

Personal Website (2024): Created a personal website - for the HTML and CSS I iteratively used AI tools (Claude, Gemini, ChatGPT) to generate and customise the markup. I then used Flask and Python to put the site together - for this part no AI tool was used as I wanted to leverage and strengthen my Python skills.
